

A DEEPER VIEW®

Real-time data capture and in-depth analysis

SIMPLE

SMART

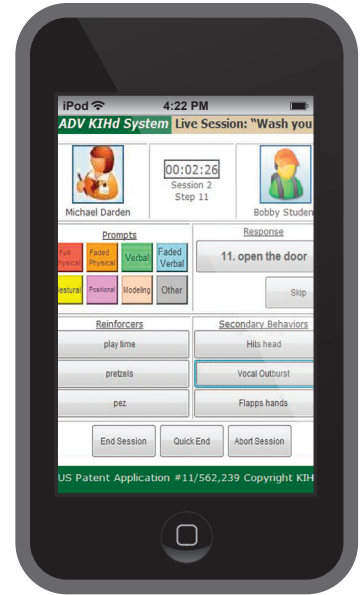

You've dedicated your life to breakthrough moments in special education. So have we.

## Introducing A Deeper View.

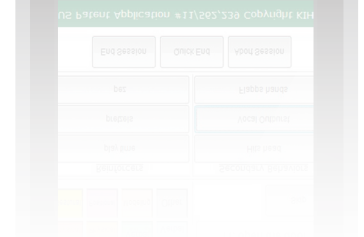

- Simple. Smart. Easy to use. Created by one enterprising parent of two children with autism. This is the breakthrough tool that will dramatically improve your ability to collect data. Lots of data.

And what data it is! Colorful and in real-time, with in-depth graphs and reports. See what's working and what's not. Watch learning trends jump off the page. Speed the path to real, measurable results.

Recall the reason you're here.

Collect Data from your hand held device.

## Change the special education playing field.

### ● Educators and Therapists

#### End the burnout.

We all know how labor-intensive data collection is. Literally save hours each day. Capture more of what you see, and see more of what you capture.

#### Put the Individual back in IEP.

Create custom curriculum for each student. A Deeper View is easy to configure and use. Individualized parameters for each target.

#### Make better and more informed decisions.

Progress monitoring like never before. Data is captured and measured with each session. Rapid evaluation of information permits informed instructional decisions.

### ● Parents

#### Share data.

"Show me the Data." A Deeper View makes it easy to address this key concern of special needs children, and provide daily reports.

#### Collaborate.

Teachers, therapists and parents have a collaborative space to celebrate victories and breakthrough moments together.

#### Take an active role.

Parents take an active role in their child's development, seeing firsthand the metrics of baseline, treatment, and mastery criteria on a session-by-session basis.

## How it Works.

### ● Observe and Capture.

Create custom curriculum for each student. Capture details from hand held devices as they happen, or following via video or manual input.

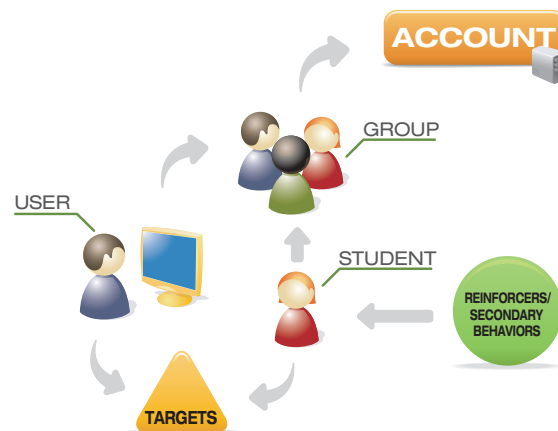

### ● Track, Measure and Report.

Real time graphs in easy to read format. Accurate measures of improvement or regression for current goals and objectives. Prompts, Secondary Behaviors, and Reinforcers all highlighted.

### ● Manage with ease

Manage the relationships involved in each child's education.

With an Account at the top of a hierarchy tree, an unlimited number of Groups may be created. Each Group establishes the curriculum relationships between Data Collectors and Subjects. Each Data Collector is linked to the students with whom they work.

## How Easy Is It?

### ● Easy to learn.

You'll be amazed how fast and easy it is to learn.

### ● Affordable.

Our mission is to support the growing number of families affected with special needs and autism spectrum disorders. Our goal is to make A Deeper View as affordable as possible, as little as \$7.50 per student per month.

### ● Try it free!

Register online at ADeeperView.com for a free trial account for 7 days. Call us at 754-224-1279 and we'll help you configure your account.

## Key Features

- Collection methods: Live, Paper and Video
- Secure student data – 128 bit encryption
- Customized, user-defined curriculum
- Integrated with video
- Interface with IEP goals
- Configurable targets

A Deeper View is based on the "KIHD System", invented by Dr. Michael Behrmann, Director of Helen Kellar Institute of Human Disabilities.
